

Introducing kojoX™: The industry-leading global bioproduction ecosystem that delivers quality, speed, and scalability across the product life cycle.

Our kojoX approach is transforming and redefining the CDMO industry with unmatched agility, flexibility, and supply chain resilience. Our modular, scalable manufacturing network provides supply chain security with an agile roadmap to accelerate the delivery of life-impacting medicines to patients.

KojoX™ In Action

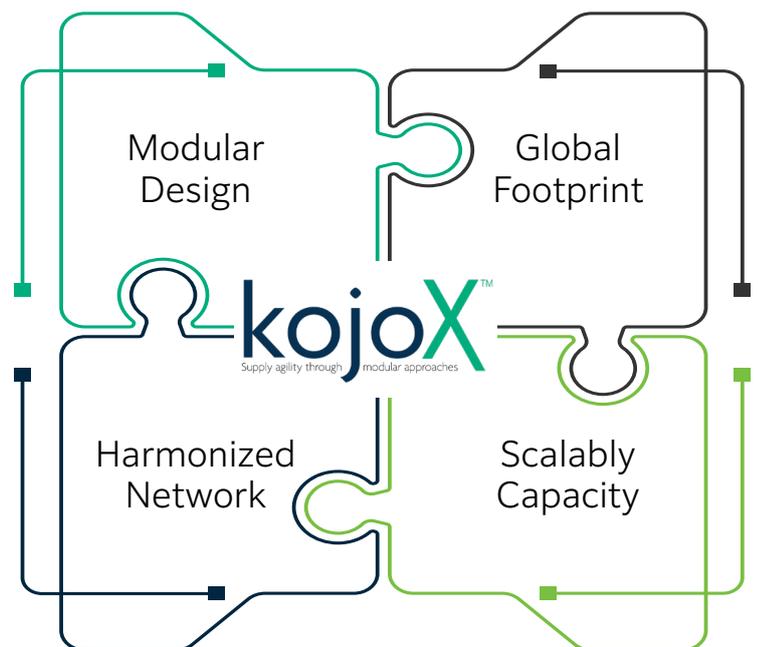

Our technical expertise and **kojoX** network accelerate regulatory approvals

Problem

A biopharma partner faced surging demand for a therapeutic but struggled with supply shortages and regulatory hurdles, making it difficult to scale up production quickly to meet market demand.

Solution

- We activated capacity and reconfigured bioproduction within our global network to meet our partner's needs
- Our manufacturing and regulatory expertise helped identify and overcome supply chain and regulatory bottlenecks to enhance speed to market
- Our modular and harmonized processes, equipment, and procedures streamlined our partner's regulatory filing requirements by enabling efficient comparability studies which reduced regulatory filing complexity

Impact

FUJIFILM Biotechnologies provided a solution that enabled our client to achieve successful regulatory approvals 5 months faster, accelerating delivery of life-impacting therapies to patients in need.

Partners for *Life*

"Partners for Life" represents a transformative approach to development and manufacturing, emphasizing relationships founded on trust and transparency — founded in people-centric values, transformative science and innovation, and unprecedented delivery.
