

Introducing kojoX<sup>TM</sup> : The industry-leading global bio-production ecosystem that delivers quality, speed, and scalability across the product life cycle.

Our kojoX approach is transforming and redefining the CDMO industry with unmatched agility, flexibility, and supply chain resilience. Our modular, scalable manufacturing network provides supply chain security with an agile roadmap to accelerate the delivery of life-impacting medicines to patients.

# KojoX In Action

Our scientific expertise and **kojoX** network enable an **optimized regulatory pathway for a high-volume, multi-modal molecule.**

## Problem

A biopharma partner needed to secure supply continuity for a high-volume, complex multi-modal molecule while staying on track for a critical BLA submission timeline.

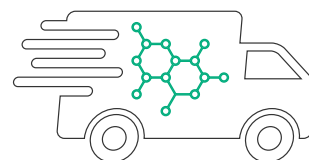

## Solution

Leveraging the **kojoX** approach, FUJIFILM Biotechnologies and the partner collaborated to develop a fast-track validation plan for a multi-site manufacturing strategy that provided:

- Seamless process validation and characterization across our harmonized network sites
- Optimized regulatory pathway for a streamlined BLA submission
- Risk mitigation strategy to ensure supply chain resilience

## Impact

We delivered a commercial-ready bioproduction solution for our partner's multi-modal molecule within the prescribed BLA submission timeline, enabling faster market entry and supply security through our integrated global biomanufacturing network.

Partners for *Life*

**CDMO**  
LEADERSHIP  
AWARDS2024

"Partners for Life" represents a transformative approach to development and manufacturing, emphasizing relationships founded on trust and transparency — founded in people-centric values, transformative science and innovation, and unprecedented delivery.
