

Accelerated Delivery of Manufacturing Capacity Using the kojoXTM Ecosystem

The Challenge

Rapid Expansion of Drug Substance Manufacturing Capacity

- A biopharma partner faced rising market demand for a critical drug product
- Rapid scale-up of drug substance manufacturing was required
- On-time delivery was critical to avoid supply disruption to patients

How to Deliver On-Time

- Accelerated facility and process design
- Procurement and installation of long-lead, custom equipment

The kojoX Difference

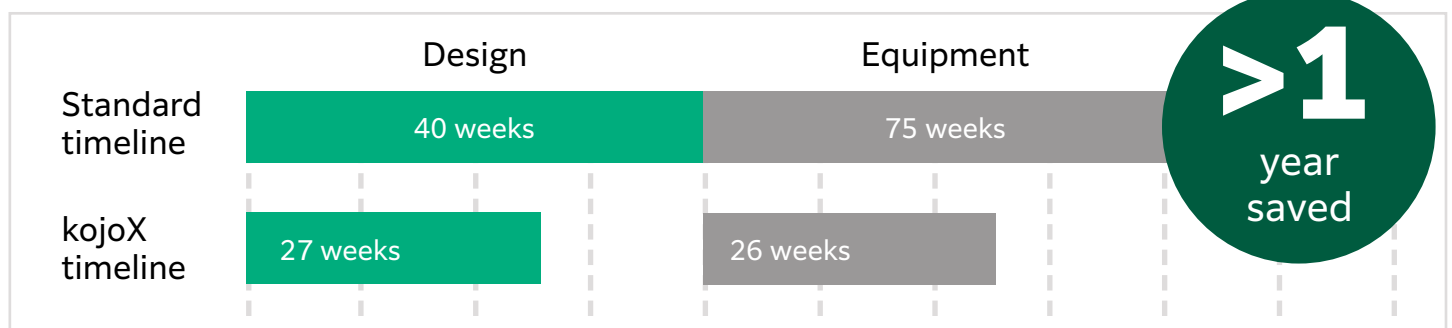

The kojoX network enabled equipment to be sourced, prioritized, and redeployed at Holly Springs, NC to meet urgent manufacturing demands

Standardized layouts and equipment enabled reprioritization of long-lead time equipment

Future-ready facility design enabled rapid reconfiguration for equipment upgrades

Why kojoX Delivered Faster

Trusted Vendors

Using existing relationships and long-standing vendors that are familiar with kojoX simplified onboarding while supporting the rapid design and equipment installation timelines.

kojoX network is built for speed, flexibility and replicability

Fewer unknowns, faster decisions, and rapid implementation enabled project execution in half the standard timeline*

*As defined by quoted durations for new process design and fabrication.

Partners for *Life*

“Partners for Life” represents a transformative approach to development and manufacturing, emphasizing relationships founded on trust and transparency — founded in people-centric values, transformative science and innovation, and unprecedented delivery.
