Patients first:

Primary Packaging and Fill-Finish Strategies for Sensitive Biologics

Time	Agenda
08:30	Arrival. Light breakfast
09:15	Welcome - Overview of FUJIFILM Biotechnologies and Hillerød DS
09:45	Fujifilm DP and FG manufacturing services overview
10:05	Gerresheimer company overview
10:30	Collaboration between primary packaging supplier and CMO: From selection to successful fill-finish
11:00	Approaches to a holistic contamination, manufacturing and product control strategy
11:30	RTU Vials, SYS & cartridges: Market trends and evolving customer needs (update RTU alliance)
12:00	Lunch
13:00	Installing real time viable environmental monitoring in filling isolator
13:30	Group tours of DP and FG facility
14:45	Fill-finish readiness of RTU containers: Technical requirements for aseptic processing
15:15	Process sciences DP lab services
15:45	Autoinjector compatibility with primary containers: From fill-finish to device integration
16:15	Robust and agile technology transfers
16:35	Elite platform: High-performance packaging for sensitive biologics
16:55	End of event. Questions. Comments
